

RSA[®] FraudAction Dashboard

Version 2.0

Release Notes

November 2020

This document lists what's new and changed in RSA FraudAction Dashboard 2.0.

What's New in This Release

FraudAction Dashboard 2.0, includes these new features, enhancements and changes.

Intelligence Feeds

FraudAction Dashboard now leverages the information gathered by FraudAction intelligence to provide insight into emerging internal and external threats via a broad range of intelligence data feeds. The feeds provide deep visibility into the cybercrime landscape. This data is available in the FraudAction Dashboard and through the APIs.

In the **Search** tab, you can now search for Intelligence Feeds data, according to these categories, each of which can be searched by sub-category:

- **Indicators of Compromise:** Includes generic data feeds which may help your organization identify, prevent or mitigate a threat in your network or your customer facing website. This category can be searched by these sub-categories:
 - Emails
 - IPs
 - URLs

- **Compromised Cards:** Data reports on full or partial card information associated with an organization's BINs, recovered from multiple sources. This category can be searched by these sub-categories:
 - Fraud Communication Channels
 - Underground Credit Card Stores

For more information about Intelligence Feeds, see *Intelligence Feeds* in the *FraudAction Dashboard User Guide* and *Intelligence Feeds Methods* in the *FraudAction Dashboard API Reference Guide*.

Enhanced Widgets to Display Essential Data

These widgets now display additional essential summary data, without the need to drill down:

- **Attack Trending- Cases & Elements:** The total number of cases and the total number of elements are displayed in the widget, for the selected time display.
- **Detection Layers:** The percentage of elements detected by each detection layer is displayed in the widget, next to the layer name.

For more information, see the related widget descriptions in *Dashboard Tab* in the *FraudAction Dashboard User Guide*.

Infrastructure and Security Enhancements

This release includes continued infrastructure and security enhancements to comply with industry and third-party standards and recommendations.

Supported Browsers

The latest version of these browsers are supported:

- Google Chrome
- Microsoft Edge
- Mozilla Firefox

Related Documentation

The FraudAction Dashboard documentation includes these guides:

Guide	Description
<i>User Guide</i>	This guide describes how to get started with the FraudAction Dashboard, and describes the functions and features that are included and supported in FraudAction Dashboard.
