** RSA IGL - Nov/Dec 2019 Webinar Recording **

We had a great final webinar of 2019 with a guest speaker from Dell Technologies, to explain how they use RSA IGL at such large scale and their journey so far!

To watch back, [click me](#)

(note: you need to be logged in to watch this video)

→→ Next Webinar: Jan 29th - Register today! ←←

The next RSA IGL webinar is scheduled for Wednesday 29th January. We have a great agenda to start the year off, with demos from both our RSA Engineering and Professional Services teams.

Register today: [click me](#)

RSA Announces Planned Updates in Operating System Support - RSA IGL v7.2

With the next release of RSA Identity Governance and Lifecycle, v7.2 – currently scheduled for the first quarter of 2020 – the Operating Systems supported for software-based installations will change.

In alignment with the Operating System Vendor support schedules and based on customer requirements, RSA is adding support for Red Hat Enterprise Linux version 7 (update 2 and above) as well as the latest SuSE Linux Enterprise Server version 12 service pack support (SP4). RSA will no longer support installations on Red Hat Enterprise Linux version 6 or SuSE Linux Enterprise Server version 11 for RSA Identity Governance and Lifecycle v7.2 and above.

RSA will continue to support Red Hat Enterprise Linux version 6 or SuSE Linux Enterprise Server version 11 on RSA Identity Governance and Lifecycle v7.1.x; however, customers upgrading to the next release will have to also upgrade the underlying Operating System accordingly. RSA is providing this information in advance of the next release to allow customers to include into their upgrade and deployment planning.

If you have any questions or need more info, please see this blog post and reply [here](#)

RSA IGL 2019 Summary

What a great year 2019 has been for RSA IGL with you, our RSA Link community - we launched a monthly newsletter, followed up by a live webinar, not to mention all the other great content and blogs that were published! We are all very excited about the great content we have upcoming in 2020.

A summary of all the 2019 content published is [here](#) and some of the highlights I wanted to call out are:

5 Webinars Hosted

We hosted 5 new webinar events, which were all live and interactive. These webinars included various topics, such as: RSA IGL roadmap, RSA product feature demos, RSA Solutions from Professional Services plus some great customer success stories! All of these had interactive Q&A and drove some great conversations.

All webinars were recorded so you can watch back if you missed them. To find them all, with a summary, please click [here](#)

9 Newsletters Published

We started the year off with the publication of the monthly RSA IGL Newsletter. This has included loads of great topics and information to help our clients and share what's happening in the RSA IGL world. Each month we have summarised key information and shared various solutions and guides that can help.

A full summary of the newsletters and content included each month, is found [here](#)

RSA IGL University

There is a LOAD of great content available and Megan has done a great job to summarise everything you need to know in this blog post, found [here](#)

Don't forget, as an RSA IGL customer, you have a huge amount of content included with your product. Not to mention the fact you can now get RSA IGL certified too!

RSA DataReach

RSA Professional Services has created DataReach. A simple, scalable solution for governing and provisioning many databases, Windows & UNIX endpoints without the need for individual configuration. Multiple customers applied this solution in 2019.

We have created some great content and its worth reviewing if you missed this!

Overall summary and whitepaper found [here](#) Datareach demo video, found [here](#)

New Product Features

Over the year, the team created some great videos on the new product features within RSA IGL v7.1.1. **Note:** A full "what's new" for RSA IGL v7.1.1 can be found [here](#)

Other deep dive videos can be found at the below links:

Closing comments...

- Please help us by completing this end of year survey, found [here](#)
- Are you RSA IGL certified? If not and would like to be, why not take a practice test and see how you get on, more info found in the blog post here: [click me](#)
- If you have ideas/suggestions for dashboards you would like to see, or want to share would you have done, please let me know in the latest dashboard blog: [click me](#)

Thanks,

Jamie Pryer - Global Services Product Lead, Identity
