Revision History

Revision Number	Description
Version 1.0	Airwatch and added instructions for configuring the RSA Identity Governance Account data collector and Entitlement data collector
Version 1.1	Updated document with minimum version support.
Version 1.2	Workspace One 19.02 version support

Purpose

This data sheet provides the configuration information required to create a new Airwatch Account Data Collector and Entitlement Data Collector.

Supported Software

RSA Identity Governance and Lifecycle: 7.0 and Above

Application: AirWatch 9.1, Workspace One 19.02

Collector Type: Account Data Collector, Entitlement Data Collector

Account Data Collector

Prerequisites

Need an AirWatch instance with user credentials.

Configuration

The configuration of the Account data Collector is completed through a number of screens. This section helps you to fill in the values for each screen.

Collector Description

The following table lists the parameters on the “Collector Description” screen, while creating the Collector.

Field Name	Value
Collector Name	Airwatch ADC
Description	Airwatch Account Data Collector
Data Source Type	Airwatch
Agent	AveksaAgent
Business Source	The created Application or Directory
Status	Active
Copy from	N/A
Scheduled	Default: No

Configuration Information

The following table lists the parameters on the “Configuration Information” screen, while creating the Collector.

Field Name	Value
Airwatch UserName	< Username of administrator having API access roles>
Password	<Password of administrator>
Airwatch BaseURL	<REST API URL of AirWatch SAAS deployment >
REST ApiKey	<REST API Key>
Proxy Host	<proxy host if you are using proxy server to access internet>
Proxy Port	<proxy port if you are using proxy server to access internet>
Proxy Username	<proxy username if you are using proxy server to access internet>
Proxy Password	<proxy password if you are using proxy server to access internet>

Note: User needs to retrieve correct URL (host) to avail the service and needs to enter it in the textbox provided on Collector’s Configuration (Settings) Page. Parameters Proxy Host, Proxy Port, Proxy Username, Proxy Password are needed only if collector runs through a proxy server.

Map Collector Attributes to Account Attributes

The following table lists the parameters on the “Map Collector Attributes to Account Attributes” screen, while creating the Collector.

Field Name	Value
Last Login Date	<Leave it Blank>

Expiration Date	<Leave it Blank>
-----------------	------------------

Map Collector Attributes to Account Mapping Attributes

The following table lists the parameters on the “Map Collector Attributes to Account Mapping Attributes” screen, while creating the Collector.

Field Name	Value
User Reference	Username

Map Collector Attributes to Group Attributes

The following table lists the parameters on the “Map Collector Attributes to Group Attributes” screen, while creating the Collector.

Field Name	Value
Owner	GroupName

Edit User Resolution Rules

The following table lists the parameters on the “Edit User Resolution Rules” screen, while creating the Collector.

Field Name	Value
Target Collector	<Created Identity Data Collector; Default: Users>
User Attribute	Email-Address; Default: User Id

Edit Member Account Resolution Rules

The following table lists the parameters on the “Edit Member Account Resolution Rules” screen, while creating the Collector.

Field Name	Value
Target Collector	<Created AirWatch Account Data Collector >
Account Attribute	Account Name

Edit Sub-Group Resolution Rules

The following table lists the parameters on the “Edit Sub-Group Resolution Rules” screen, while creating the Collector.

Field Name	Value
Target Collector	<Created Airwatch Account Data Collector >
<i>Account Attribute</i>	<i>Name</i>

Data/Attributes to be collected

- *email*
- *username*
- *firstname*
- *Lastname*
- *Status*
- *GroupName*

Entitlement Data Collector

Prerequisites

Need an AirWatch instance with user credentials.

Configuration

The configuration of the Entitlement data Collector is completed through a number of screens. This section helps you to fill in the values for each screen.

Collector Description

The following table lists the parameters on the “Collector Description” screen, while creating the Collector.

Field Name	Value
Collector Name	Airwatch EDC
Description	Airwatch Entitlement Data Collector
Data Source Type	Airwatch
Agent	AveksaAgent
Business Source	The created Application or Directory
Status	Active
Copy from	N/A
Scheduled	Default: No

Configuration Information

The following table lists the parameters on the “Configuration Information” screen, while creating the Collector.

Field Name	Value
Airwatch UserName	< Username of administrator having API access roles>
Password	<Password of administrator>
Airwatch BaseURL	<REST API URL of AirWatch SAAS deployment >
REST ApiKey	<REST API Key>
Proxy Host	<proxy host if you are using proxy server to access internet>
Proxy Port	<proxy port if you are using proxy server to access internet>
Proxy Username	<proxy username if you are using proxy server to access internet>
Proxy Password	<proxy password if you are using proxy server to access internet>

Note: User needs to retrieve correct URL (host) to avail the service and needs to enter it in the textbox provided on Collector’s Configuration (Settings) Page. Parameters ProxyHost, ProxyPort, ProxyUsername, ProxyPassword are needed only if collector needs to run through a proxy server.

Group Evaluation

The following table lists the parameters on the “Group Evaluation” screen, while creating the Collector.

Field Name	Value
Associated Collector	<Created AirWatch Account Data Collector>

Group Value evaluates to	Name
--------------------------	------

Account Evaluation

The following table lists the parameters on the “Account Evaluation” screen, while creating the Collector.

Field Name	Value
Associated account collector	<Created AirWatch Account Data Collector>
Account Value evaluates to	Account Name

Data/Attributes to be collected

- *username*
- *devicename*
- *profilename*
- *groupname*
