

RSA Identity Governance and Lifecycle 7.2.1 Patch 05 Release Notes

What's New

Feature	What's New
Data Collection, Processing, and Management ACM-103540	'Kill Task' option is used for long-running collections to kill the collection on the agent and abort the data run.

Fixed Issues

Account Management

Issue	Description
SF-01732269 ACM-109601	Directly Entitled roles were shown incorrectly in PV_USER_DIRECT_ACCESS and V_AVR_USERACCESS

AFX

Issue	Description
SF-01742049 ACM-109789	AFX requests were executed in the provisioning command node when the connector was in TEST mode
SF-01755290 ACM-110185	During fulfillment state, completion of CreateAccount CR item, concurrent email was sent to update the temporary password object to handle.

Change Requests and Workflows

Issue	Description
SF-01724453 ACM-109579	Duplicate changes were requested and displayed under Users >> Requests if a user account is shared by multiple users.
SF-01740798	The technical approval node in fulfillment sends a duplicate email for approval activity when the approval activity is rejected.

ACM-109746	
SF-01735959 ACM-109572	The decision node was not working as expected when the condition name is not null.
SF-01669400 ACM-108097	Performance issue with CR generation from Rules and Reviews
SF-01762001 ACM-110624	Items that are closed when an email is sent without body content is now handled
SF-01669400 ACM-108145	'TX - row lock contention' in UPDATE T_AV_CHANGE_REQUESTS

Collections

Issue	Description
SF-01675695 ACM-109557	Data collection queue time was increased after upgrade to RSA IGL 7.2.0 P04.
SF-01693308 ACM-109573	The collector was slow in IRP in '9/12: Process New Role Relationships'

Data Collection, Processing, and Management

Issue	Description
SF-01724028 ACM-109561	When REST Identity collector mixing attributes have an empty attribute in the data file collector, the collector collects the attribute from the next user in the data file.
SF-01716999 ACM-109339	Business Units (Application, Directory & RoleSet) cannot be deleted when the collections associated with them are in progress
SF-01685747 ACM-109262	ORA-30926: unable to get a stable set of rows error. While Merging MEUID from T_MASTER_USER_MAPPING for the users from Inactive IDC's to avoid duplicates as users still active in the system.

Database Management

Issue	Description
SF- 01643600 ACM-107458	The ORA-39083 error handles the import of archive data. The data pump command uses the parameter REMAP_SCHEMA which remaps the table's owner and not the owner of the function used by the virtual column.

Email

Issue	Description
-------	-------------

SF-01756763 ACM-110245	Importing an email template failed with 'Could not determine user id for userID, value=null'
---------------------------	--

Installer

Issue	Description
ACM-110607	Legacy server startup scripts were not copied in the right path for RHEL 7 on the patch application.

Password Management

Issue	Description
SF-01747900 ACM-110063	Synchronized the number of mismatches in the business source associated with password groups in password management.

Performance

Issue	Description
SF-01751179 ACM-110017	Using Public View PV_CHANGE_REQUEST_ACTIVITY performance was very slow in login and landing in the home dashboard.
ACM-108574	Navigating between tabs reviews was slow

Purging

Issue	Description
SF-01726699 ACM-109394	Optimization for Data Purging Merge Query
SF-01720185 ACM-109459	Purging included for the event in 'SUMMARY','PP_SUMMARY' and either run id was null or less than zero.

Request Forms

Issue	Description
SF-01751967 ACM-110094	While editing a submission variable, an error was thrown because there was the limit for ADDITIONAL_CONFIG column field to 4000 bytes causing issue with space.
SF-01754048 ACM-110097	Incorrect behavior of forms was using entitlement table with "Align selection with subjects" and "Select only one entitlement"

Reports

Issue	Description
SF-01719183 ACM-109558	Fixed the issue in 'All Uses'. Now, 'system' does not appear.
SF-01759973 ACM-110361	Encoding was missing while loading the report having multibyte chars. Some of the report migrations were failing when data included multibyte chars.

Reviews

Issue	Description
SF-01745380 ACM-109860	When creating review definitions, a parsing failed warning appears while including users with Date attribute and 'between' clause in the search filter.
SF-01685638 ACM-108424	Fixed the ongoing challenges with scalability and User Experience issues with AFX Attribute Sync
SF-01742338 ACM-109954	Date format used to parse 'accountExpres' changed to "mm-dd-yyyy HH:mm:ss"
SF-01759934 ACM-110350	Processing Data was not showing on review bulk action.

Role Management

Issue	Description
SF-01728957 ACM-109414	Roles without change requests were stuck in the applied state and further modifications were not allowed on those roles until the states are updated in the database to Changed.
SF-01740636 ACM-109708	Indirect Change items were not generated for removing entitlements from Child roles.
SF- 01684148 ACM-108491	The child role analytics tab was not showing the indirect members (Inherited from parent role) in the missing entitlements.

Rules

Issue	Description
SF-01737120 ACM-109599	Rules Preprocessing was not triggering due to cleanup performed by Deleted Collector package

SF-01751718 ACM-110041	V_CLOSED_VIOLATIONS contained null names for accounts/entitlements which were deleted while having an open violation.
SF-01758888 ACM-110444	Exporting and Importing rule results with NullPointerException are handled

Security

Issue	Description
SF-01745887 ACM-109845	A business owner with view-only access was able to edit user mappings.This has been corrected.

Server Core

Issue	Description
SF- 01678523 ACM-108873	Made changes to the startup scripts of the application (aveksa_server.service and afx_server.service) to start. After the service network.target is started after the reboot.

Web services

Issue	Description
SF-01740967 ACM-109736	In CheckAccess web service API, if the account does not have an entitlement then the user associated with the account was being checked for entitlement.
SF - 01743055 ACM-110153	Attribute Sync Not Working with user Attribute Change Webservice
