

# SecurID Governance and Lifecycle 7.5.2

## Patch 03 Release Notes

7.5.2 Patch 3 is available as a patch and full installer. The 7.5.2 original GA build has been replaced with the 7.5.2 P03 full installer. If you have installed 7.5.2 or later, you can apply the 7.5.2 P03 patch. Otherwise, SecurID recommends that you use the 7.5.2 P03 full installer for any new deployment or upgrade from earlier versions.

### What's New

The following sections describe the new features and improvements in version 7.5.2 P03

Feature	What's New
AFX ACM-113840, ACM-113704	Windows-based Remote AFX server is supported by building scripts to install/uninstall AFX server and start/stop services.
Security ACM-111825 ACM-111027 ACM-112386 ACM-112693	Older versions of the BSAFE crypto library were using expired certified jars signed by an untrusted vendor (SUN Microsystem) which was flagged by the IBM WebSphere platform. As a fix, BSAFE crypto was upgraded and moved to the 6.2.5.0.2 patch. <b>Note:</b> The minimum system requirement for IBM WebSphere is IBM JDK 1.8.0_281 or later.
ACM Security ACM-113233	The G&L application migrates to RSA-certified custom log4j libraries. The log4j library is built over apache log4j 1.2.17v and removes some of the recently discovered vulnerable files to ensure no exploit can be done using them.

### Functional Changes

Feature	What's New
Password Management ACM-113315	In PasswordSynchronization UI, the User mapping attribute added custom attributes to fetch user data for password synchronization.
Change Request and Workflow ACM-113072	Account Entitlements are cached during the CR generation instead of querying the DB each time for different Entitlements that the accounts have.
Rules ACM-104766	For the attribute change rule, the entitlement selection dialog for additional/removal of entitlements under the 'Create change requests' option is used to allow only explicit selection of entitlements. This selection dialog is now replaced with the entitlement selection dialog that is similar to the one used in user access rules and reviews so that

	entitlements can be picked either explicitly or with attribute conditions or with advanced SQL. Entitlement selections on existing attribute change rules will automatically be migrated to the new form.
--	---

## Fixed Issues

### Access Request

Issue	Description
SF-01779333 ACM-111759	The technical role part of the Business Role was shown to the user, even after removing the user from the business role. During the role explosion, only the users directly entitled to Business Role were marked for delete. Any technical role associated with the user through the business role was left as it is. This resulted in showing the technical role on the user access page.
ACM-113586 SF-02320562	This is a high-impact issue affecting approvals and activities in the change requests. For details, refer to the advisory at <a href="https://community.securid.com/t5/securid-governance-lifecycle/urgent-securid-governance-and-lifecycle-product-advisory-request/ta-p/676850">https://community.securid.com/t5/securid-governance-lifecycle/urgent-securid-governance-and-lifecycle-product-advisory-request/ta-p/676850</a>

### Admin Error

Issue	Description
SF-02267708 ACM-112634	Admin Error Notification Rule was sending admin errors even if it was not from the error source.

### AFX

Issue	Description
SF-02266979 ACM-112944	SOAP Type connectors was throwing "java.lang.NoClassDefFoundError: org/apache/cxf/ws/policy/AssertionInfoMap" error.

### Change Requests and Workflow

Issue	Description
SF-02319529 ACM-113547	Change Request information like approvals and fulfillment progress is not visible. Tabbed style UI was introduced in V7.5.0 for change request detail page introduced approvals and activities tab but permission for this page restricted to edit permission.
SF-02287762 ACM-113309	"Upload Attachment" was no longer available for a Requester in the change request detail page from 7.5.0 onwards.
SF-02271835 ACM-112787	Optional Email Display name required and causes issues with some clients. As a fix made the Email Display name optional.

SF-01806957, 01819390, 02271413 ACM-111658	Change requests were getting stuck when removing a user from the nested group. Removed the groups which were provisioned through nested groups causing Change Request to get stuck.
SF-01795819 ACM-111292	Could not submit text for the complete node. As a fix updated the correct arguments while making the WP API call.

### Collector

Issue	Description
SF-02316988 ACM-113520	Temporary files not removed from agent-transaction-data after failed collection.
SF-02294089 ACM-113202	REST IDC collecting data improperly as data from the endpoint has an empty value or null at the parent hierarchy is not collect correct data from the endpoint.
SF-02254936 ACM-112421	Group Owner Resolution was case-sensitive in Account Collectors.
SF-01792234 ACM-111566	Changes made to Role Collector were not saved. The application attribute was set to null explicitly.

### Data Collection Processing and Management

Issue	Description
SF-02304079 ACM-113255	After upgrading to 7.5.0 P02, the Indirect Relationship Processing was slower.

### Email

Issue	Description
SF-01702237 ACM-109425	Email Approval functionality is not working through Android mobile Outlook. As a resolution a new custom setting flag named custom.DisableApprovalEmailAddressEncoding must be set to true.

### Password Management

Issue	Description
SF-02323185 ACM-113629	Issues with migration from 7.5.0 to 7.5.2 P01. AVCSUSER password is not getting encrypted which is causing migration issues. Handling AVCSUSER and SYS_PASS and updating the configuration files cleared the issue.

## Platform

Issue	Description
SF-02297160 ACM-113125	JDK version upgraded from 1.8.0_212 to 1.8.0_312. As a fix added upgraded JDK tar which can be used to upgrade JDK to 312.

## Roles

Issue	Description
SF-02027714 ACM-112174	Suggestions and Violations were not appearing while creating a role before applying changes.

## Role Management

Issue	Description
SF-01757350 ACM-111503	CR was taking time when there were too many items to generate a change request.

## Server Core

Issue	Description
SF-02314932 ACM-113322	A large volume of data causes the purge job to hang while deleting AFX related data. Changes were made to batch delete data and also handled errors.

## UI

Issue	Description
SF-02306915 ACM-113300	All calendars across the IGL application does not appear when the user switched to the Swedish locale. This issue occurs because of few invalid characters (") exist in Swedish translation.

## Platform Matrix

The latest application server and JDK version have been certified for this release.

	<b>RSA Identity Governance and Lifecycle Hardware Appliance</b>	<b>RSA Identity Governance and Lifecycle Software Bundle</b>	<b>Software Only (WebLogic or WebSphere)</b>	<b>Container</b>
<b>Application Server Version</b>				
WildFly 24.0.1 Included	Qualified	Qualified	Qualified	Qualified
