

SecurID Governance and Lifecycle

7.5.2 Patch 04 Release Notes

What's New

The following sections describe the new features and improvements in version 7.5.2 P04

| Feature | What's New |
|--------------------------------------|--|
| AFX Server ACM-113935 | On patch or version upgrade of SecurID Governance & Lifecycle Cloud, any Remote AFX Server on Windows must be upgraded automatically. Note: AFX Server on Windows is only supported for SecurID Governance & Lifecycle Cloud. |
| AFX Install ACM-113840 | Remove the text 'Agent' from all (four) batch files related to AFX Server on Windows installation and startup scripts. All the AFX services start mode is configured as Manual. Note: AFX Server on Windows is only supported for SecurID Governance & Lifecycle Cloud. |
| Rules ACM-113801 | A dialog, with multiple links for different types of entitlement selection, is replaced by a tab-based dialog. The new dialog has a separate tab for each type of entitlement. |
| Server Core ACM-110312 | The existing RSA-certified 1.2.17 log4j library is upgraded to 2.17.2v to fix various security flaws and vulnerabilities. Note: This upgrade does not impact the AFX module. It will continue to use RSA certified 1.2.17 library and will be upgraded in a future release/patch. |
| Role Management ACM-112704 | Violation is not displayed when the request is raised for the new Entitlement. This occurs when multiple collectors are queued for the data collection and Rule Preprocessing is delayed until the last collector completes collecting the data. To resolve this issue, a new custom parameter "custom.ImmediateRulesPreProcessingForCollectors" is introduced. If it is set to True (the default value is False), it enables the "Immediate Rule PreProcessing" checkbox for all collectors (except Identity Collectors). If the "Immediate Rule PreProcessing" is enabled (default is unchecked or not enabled) for an individual collector, then Rule PreProcessing for that collector runs immediately after the collection. |

Fixed Issues

Access Request

| Issue | Description |
|---------------------------|---|
| SF-02318451 ACM-113725 | When users have the access to same Technical Role (TR) or Global Role (GR) from multiple Business Roles (BR), then the removal of TR or GR from |

| | |
|---|---|
| SF-01834062 ACM-112834 SF-02318447 ACM-113537 SF-02273046 ACM-112636 | one of the BR results in the removal of TR/GR from the user. The user in this scenario continues to have access to the TR/GR from the other BR. |
| SF-01767712 ACM-110590 | AFX was unable to update the state of the change item in IGL when the entitlements of deleted accounts were revoked. |

Change Requests and Workflow

| Issue | Description |
|---|---|
| SF-02316902 ACM-113514 ACM-113515 | Users who are Approvers (Supervisor, Supervisor-Delegate, and Application Owner) encountered an error when they clicked a hyperlink in the Change Request column of Approvals that were assigned to them. |
| SF-02301090 ACM-113245 | The password capture tool creates duplicate change requests. |
| SF-02295433 ACM-113129 | Approvals display workflow data after purging. |
| SF-02294084 ACM-113115 | When a workflow is created and the fulfillment node is renamed, then the fulfillment sub-processes of that change request are reflected under the 'Approval' section and no fulfillment section is available for that change request. |
| SF-02284071 ACM-112945 | On the manual fulfillment form, a few unnecessary variables were displayed even when the "Show job level variable" option was unchecked in the fulfillment workflow. |
| SF-02270904 ACM-112870 | The Fulfillment phase called an out-of-path fulfillment phase workflow. |
| SF-02261111 ACM-112569 | Indirect items are not called for approval when grouping was done by Category. |
| SF-02270419 ACM-112562 | The customer received an error when a change request was created to terminate a user using webservice. |
| SF-02266598 ACM-112514 | The requests pending Technical Approval displayed a 'WF stall' error when the stall detection job was run. |
| SF-02266581 ACM-112513 | Object Name prefix settings were ignored when the change requests were created through 'Rule'. |
| SF-02251569 ACM-112340 | When a user is added to a role, shared accounts are also added to the group. |
| SF-02250049 ACM-112304 | The Approval and Rejection response email had no space at the end of the sentence. |

| | |
|---------------------------|---|
| SF-01828538 ACM-112018 | File attachments to a request led to workflow nodes to function inaccurately. |
|---------------------------|---|

Collector

| Issue | Description |
|---------------------------|--|
| SF-02346944 ACM-114169 | Generic REST collector did not receive accurate results in role memberships. |

Data Collection Processing and Management

| Issue | Description |
|---------------------------|--|
| SF-2348574 ACM-114217 | Database Collectors failed due to the Data Read Exception. |
| SF-02318131 ACM-113519 | Circuit breaker trips for multi-app account collector when one or more application no longer collects data |

Email

| Issue | Description |
|--------------------------|---|
| SF-2357305 ACM-114510 | Unable to de-select a user from the "Send System Notifications To" user selection screen when the email setting was modified. |

Password Management

| Issue | Description |
|---------------------------|--|
| SF-02301005 ACM-113335 | On the Password capture tool, input parameters such as User, and password values with XML special characters (such as '&', '<', '>') for Synchronize password ChangeRequest are now supported. |

Roles

| Issue | Description |
|---------------------------|---|
| SF-02352727 ACM-114305 | When the user clicked Finish , the role was not reviewed completely and was ignored during sign-off as all the members and entitlements were reviewed earlier and no changes were performed. |

Role Management

| Issue | Description |
|---------------------------|---|
| SF-2330968 ACM-113795 | Some records in T_AV_ROLE_MISSINGENTS are still available for roles that were deleted. |
| SF-02311233 ACM-113424 | When a customer copies an existing role with members and entitlements, then the copied role is not created with the member. |

UI

| Issue | Description |
|---------------------------|--|
| SF-02358926 ACM-114512 | The JavaScript file could not be uploaded from the User Interface. |
| SF-02323904 ACM-114030 | The Guidance Panel was not available on the UI when a customer performed a review using Microsoft Internet Explorer. |
| SF-02325621 ACM-113669 | Proper authorization in code was not available for the missing tabs. |
| SF-02194788 ACM-112306 | Users tab took a long time to load. |

Attribute Sync

| Issue | Description |
|---------------------------|---|
| SF-02346145 ACM-114255 | Attribute Sync Requests were not tagged to users. |

Reports

| Issue | Description |
|---------------------------|---|
| SF-02330097 ACM-114128 | A single column report exported by the customer in the .xlsx format did not function accurately |

Account Management

| Issue | Description |
|---------------------------|--|
| SF-02320419 ACM-113583 | The Technical/Business Owner of an application was able to edit 'App Roles' and 'Entitlements' but not 'Groups'. |

Authentication

| Issue | Description |
|---------------------------|--|
| SF-02313277 ACM-113467 | Authentication sources are not in order on the login page. |

Security

| Issue | Description |
|--|---|
| SF-02306343 ACM-113430 SF-01820065 ACM-111857 | Apache Tomcat Default files (error page, index page, and example JSP) and directories were removed to ensure that sensitive information about the servers is not disclosed. |

Database Management

| Issue | Description |
|---------------------------|---|
| SF-02279074 ACM-113303 | Database collection failed with a ClassCastException during data re-encryption as the system incorrectly expected the data type for the ADDITIONAL_CONFIG attribute to be a string although the actual data type is CLOB. |

Reviews

| Issue | Description |
|---------------------------|--|
| SF-02300054 ACM-113211 | 'Set current filter as default for all users' option did not function for users with a filter set. |
| SF-02259813 ACM-112645 | When 'User Access' and 'Segregation of Duties' rules were processed together, a second invocation of the review was generated from the same Violation Review definition even when one was in progress. |

Known Issues

| Description | Workaround |
|--|---|
| Any customization on the Rollover Files and Root Logger setting were not retained in the docker environment post upgrade to 7.5.2 P04. | The customizations should be re-performed after the upgrade. |
| Any customization on the Root Level Logger setting was not retained in wildfly and changed back to default post upgrade to 7.5.2 P04. | The customizations should be re-performed after the upgrade. |
| In Websphere/Weblogic, the log4j settings (Rolling file size, Quantity, and Root Logger level) were not retained after the user performed a version upgrade (from 7.5.2P03 to 7.5.2P04). | Edit the newly formatted aveksa-log4j.properties and replace the default values with the earlier backup ones or change these values from the UI settings. |
| G&L Workflow installation failed in the WebLogic server 12.2.1.2.0 version. | To overcome the installation failure, upgrade WebLogic server to the following supported versions <ul style="list-style-type: none"> • WebLogic-12.2.1.3.0 • WebLogic-12.2.1.4.0 • WebLogic-14.1.1.0.0 |
| The 'Add Resource' option for the Supervisor node in the Workflow was partially visible. | When the Workflow window is expanded, the pagination is displayed accurately. |
| When an attempt to delete the rollback version of a workflow was made, the following exception was displayed: "A server exception has occurred on the message. Please see the server logs for details". | There is no workaround for this issue, it will be fixed in upcoming releases. |

Platform Matrix

The latest application server and JDK version have been certified for this release.

| | RSA Identity Governance and Lifecycle Software Bundle | Software Only (SecurID G&L) | Container |
|--------------------------------|--|--|------------------|
| WildFly 24.0.1 Included | Qualified | n/a | Qualified |
| WebLogic 14.1.1.0 | n/a | Qualified | n/a |
| WebSphere 9.0.5.12 | n/a | Qualified | n/a |
| JDK Version Certified | | | |
| AdoptOpenJDK 1.8.0_345 | Qualified | n/a | n/a |
| Oracle JDK1.8.0_341 (WebLogic) | n/a | Qualified | n/a |
| IBM JDK 1.8.0_331 (WebSphere) | n/a | Qualified | n/a |
| AdoptOpenJDK 11.0.8 | n/a | n/a | Qualified |
