7.5.2 Patch 05 Release Notes

What's New

The following sections describe the new features and improvements in version 7.5.2 P05.

Feature	What's New
Access Certification ACM-114738	User can view Long Description, Short Description, Help URL and Raw Name attributes in the Role Reviews display.
ACM-114596	New Status Bar has been added to the Role Review that shows the number of members that have been reviewed in the Role Review.
ACM-114594	Attributes with "Short description, Help URL, Alternate and Raw Name" should now be visible in role reviews. It should be populated by the user with plain text (containing the description of the role) when creating the role itself. This should be visible to both the reviewer & monitor.
ACM Security Model ACM-116838	Not all the logs being populated in AveksaServer.log for Host nodes in Wildfly cluster. As part of solution log4j options were added to aveksa_server to overcome this and these changes must be done on domain and host nodes. patch.sh need to be run on all the host nodes to update the service files. Note :- To run patch.sh in hosts node no need to stop Domain.
Cloud ACM-116237, ACM-115706, ACM-115704	User can view and select date/time according to their selected time zone. And choose the correct time zone that matches their city.
Platform ACM-116208	JDK version upgraded from 1.8.0_312 to 1.8.0_345. As a fix, upgraded JDK tar was added, which can be used to upgrade JDK to build 345.
Role Management ACM-116022	Entitlements are no longer duplicated in display when choosing them from Parent/Child hierarchy in a role.
ACM-115268	Custom Attributes are added for User Entitlements to Role Reviews and Definitions.
ACM-115265	Progress Bar is improved to three detailed bars (in addition to the main one) in Role Reviews.
ACM-114737	User can turn on/off the option to view User-Entitlement attributes in the Role Review and Definition.

Functional Changes

Access Certification

Feature	What's New
ACM-66352	Improving Role Review process, user can "Maintain" roles from the Role Review main page, without the need to go through every specific role's internal detail (General Info, Members & Entitlements).
ACM-61907	Improving Role Review Progress Bar to be more detailed and to view each of Roles, Members and Entitlements separately.
ACM-57589	Adding attribute "Long Description" of roles in the Role Review table options.

Change Requests and Workflow

Feature	What's New
ACM-114298	Some of the Change Requests get stuck either "P" (Processing) state or "V" (Valid) state. This occurs with random requests and random connectors. Some connectors needed to have a Retry options for stuck requests.

Cloud

Feature	What's New
ACM-114324	Transitioning from On-Prem to Cloud, files fail to be uploaded to the cloud in case they are in high count.
ACM-113585	PS personnel will have additional access to perform the functions defined for cloud monitoring. PS personnel involved will have value added monitoring/managed services solution for all G&L Cloud customers. PS users can be able to perform the following operations:- Ability to 'View All' the G&L Cloud. Ability to cancel collection runs or hung collector. Report Definition: Ability to run report (If we have special reports for monitoring team in the future). Diagnostics: Ability to download logs from the 'Log Artifact' page. Ability to run all collector types: Manage All (require the ability to run, but this is the closest - Allows edit, which is not desirable). The role assigned cannot be revoked by a customer System Administrator.

Roles

Feature	What's New
ACM-116207	"Maintain" button added in Bulk Action list where several roles can be maintained at the same time.
ACM-116200	User can change the order of the tabs in the Role Reviews page according to their priority.

Role Management

Feature	What's New
ACM-61800	User can view custom User Entitlement attributes for each member in Role Review and Definition.
