

# SecurID Governance and Lifecycle

## 7.5.2 Patch 06 Release Notes

### What's New

The following sections describe the new features and improvements in version 7.5.2 P06.

Feature	What's New
<b>Platform</b> ACM-117618	JDK version 1.8.0_352 has been qualified. An updated JDK package is provided for upgrading JDK to build 352.

## Functional Changes

### Access Certification

Feature	What's New
ACM-114597	Restricting the PS users appearing in any of the user pickers, rules & reviews screens, and if still want to see the PS users everywhere as earlier need to set <code>custom.includePSUserForProcesses = true</code> .

### Cloud

Feature	What's New
ACM-116636	The initial time viewed by default after choosing a date reverts to the browser's time zone when a user manually deletes the scheduled date input and tries to manually insert date and time. It should display the user's chosen time zone.
ACM-116465	“Cancel” button is added in SQL Utility page which can be used to cancel execution of query if takes long time.  Provided an option to set the custom timeout for an executing query along with the default timeout. Property to set timeout "custom.sqlUtilityQueryTimeout.

### UI

Issue	Description
ACM-114774	Named Query feature added to replace queries existing in java code hbm with new customized named queries.

## Fixed Issues

### Access Request

Issue	Description
SF-02374948 ACM-116408	System malfunctioned when a user requested access for multiple users under a certain condition.
SF-02378954 ACM-116173, SF-02408859 ACM-117359, SF-02396778 ACM-116871, SF-02346316 ACM-114525	Change item stays in wait for verification state, when change request created to add a user to a role and local entitlement is coming as indirect entitlement from role.
SF-02393142 ACM-116676, SF-02398996 ACM-116872	Partial Rejection of Roles still provisions underlying local entitlements.

### Admin Errors

Issue	Description
SF-02342558 ACM-114274	Log artifacts generation jobs fail.

### Collector

Issue	Description
SF-02391472 ACM-116566	Authentication token appears in plain text in the XML file when exporting metadata for generic REST collector.
SF-02386005 ACM-116424	Generic REST pagination was not working by using base URL.
SF-02335412 ACM-114389	Accounts were created multiple times in IG&L.

### Data Collection Processing and Management

Issue	Description
SF-02376537 ACM-116082	Verify Account Attributes Synchronization state was "Not Started".

## Database Performance

Issue	Description
SF-02375910 ACM-116064	“My Tasks” pane was loading slowly on the default Dashboard.

## Roles

Issue	Description
SF-02396778 ACM-116871	Local entitlements were not assigned to users when added indirectly using BRM roles.

## Role Management

Issue	Description
SF-02358134 ACM-114517	When user created a role in a role set and exited the window during creation, the created role is named “- -”.
SF-02337938 ACM-113978	Business roles created under parent role gets the arbitrary entitlement if parent role id matches with the different type of entitlement.

## UI

Issue	Description
SF-02385955 ACM-116428	ACM stop command does not kill all the WildFly processes.

## Known Issues

<b>Description</b>	<b>Workaround</b>
Even after upgrading JDK, the application might still use lower version of JDK, or it might not start if the installation user is oracle.	After upgrading JDK ,Update the JAVA_HOME value in Aveksa_System.cfg file with the latest JDK location (JAVA_HOME=/usr/lib/jvm/jdk8u352-b08) and restart the application.

## Platform Matrix

The latest application server and JDK version have been certified for this release.

	<b>SecurID Governance &amp; Lifecycle Software Bundle</b>	<b>Software Only (SecurID G&amp;L)</b>	<b>Container</b>
<b>Application Server Version</b>			
WildFly 24.0.1 Included	Qualified	Qualified	Qualified
WebLogic 14.1.1.0	n/a	Qualified	n/a
WebSphere 9.0.5.14	n/a	Qualified	n/a
<b>JDK Version Certified</b>			
AdoptOpenJDK 1.8.0_352	Qualified	n/a	n/a
