

RSA® IDENTITY GOVERNANCE & LIFECYCLE

JML RECOMMENDED PRACTICE WORKSHOP

AT-A-GLANCE:

The Joiner, Mover and Leaver recommended practice workshop provides insight in the recommended JML processes and how these fit within your organization.

Why?

- Streamline JML processes to provide better alignment between processes and product implementation which leads to TTV improvements and risk reduction
- OOTB implementation of the JML processes for easier administration which leads to cost saving

What?

- Clearly defined JML processes that work for your organization
- Definition of the prerequisites regarding the JML processes

How?

- Workshop to explain the JML recommended processes and translation of these processes for how these will work for your organization
- Workshop to define the JML prerequisites

OVERVIEW:

The workshop has been developed because customers struggle with implementing proper JML processes. The workshop takes a big problem and cuts it into small and easy steps that will increase a successful implementation.

RSA has completed many successful IAM project, all over the globe for a variety of different industry sectors. RSA's team of security experts bring years of experience and help to provide our customers with a holistic approach, which is tried and tested.

The purpose of this Joiner, Mover and Leaver (JML) workshop is to guide you on taking the right steps towards a successful implementation of JML within your organization. During the workshop RSA staff will work with you from both an IT and business view and define your JML processes based on RSA recommended processes.

The workshop will describe the JML process framework and go into different JML use cases and how these can be tuned to match your organization.

When tuning the JML process and use cases to meet your organizations requirements we will also make sure these can still be implemented in the RSA Identity Governance and Lifecycle product in an OOTB way.

FEATURES & BENEFITS:

This JML recommended practices workshop provides the following benefits:

- Clear understanding of JML recommended processes
- Translation of how the JML recommended processes work for your organization
- Overview of prerequisites that are needed when starting with JML implementation

Deliverables

- Onsite workshop
- Defined JML processes
- JML process architecture
