

# RSA® IDENTITY GOVERNANCE & LIFECYCLE

## ACCESS REQUEST RECOMMENDED PRACTICE WORKSHOP

### AT-A-GLANCE:

The Access Request recommended practice workshop provides insight in the recommended access request processes and how these fit within your organization.

#### Why?

- Streamline access request processes to provide better alignment between processes and product implementation which leads to TTV improvements and risk reduction
- OOTB implementation of the access request processes for easier administration which leads to cost saving

#### What?

- Clearly defined access request processes that work for your organization
- Definition of the prerequisites regarding the access request processes

#### How?

- Workshop to explain the access request recommended processes and translation of these processes for how these will work for your organization
- Workshop to define the access request prerequisites

### OVERVIEW:

The workshop has been developed to provide customers insight on how to best coop with implementing access request processes. The workshop takes a big problem and cuts it into small and easy steps that will increase a successful implementation.

RSA has completed many successful IAM project, all over the globe for a variety of different industry sectors. RSA's team of security experts bring years of experience and help to provide our customers with a holistic approach, which is tried and tested.

The purpose of this access request workshop is to guide you on taking the right steps towards a successful implementation of requesting access processes within your organization. During the workshop RSA staff will work with you from both an IT and business view and define your access request processes based on RSA recommended processes.

The workshop will describe the access request process framework and go into different access request use cases and how these can be tuned to match your organization.

When tuning the access request process and use cases to meet your organizations requirements we will also make sure these can still be implemented in the RSA Identity Governance and Lifecycle product in an OOTB way.

### FEATURES & BENEFITS:

This access request recommended practices workshop provides the following benefits:

- Clear understanding of access request recommended processes
- Translation of how the access request recommended processes work for your organization
- Overview of prerequisites that are needed when starting with access request implementation

### Deliverables

- Onsite workshop
- Defined access request processes
- Access request process architecture
