

RSA[®] IDENTITY GOVERNANCE & LIFECYCLE

FINACLE IMPLEMENTATION BLUEPRINT

AT-A-GLANCE:

A simple, packaged solution, which RSA Professional Services have created to reduce implementation time and cost. This solution follows RSA's recommended practices.

Why?

- Reduce the application and audit risk for Finacle.
- Lower administration costs regarding Finacle authorisation management.
- Streamline user authorisation requests and processes within Finacle (e.g. JML)

What?

- Provide Governance capabilities and Lifecycle automation for Finacle

How?

- Show who has access to what within Finacle.
- Run reviews for the business to confirm user access within Finacle.
- Provide simple and easy workflows, forms and connectors for Finacle, that business users can utilise

SUPPORTED VERSIONS*

This has been validated to work on:

- RSA IGL v7x with both Governance and Lifecycle Modules
- Finacle version: 10.2.09

**Please always check and confirm, as this solution may have been updated since this was created*

OVERVIEW:

The RSA Identity Governance and Lifecycle (IGL) Finacle web service handler enables clients to provision authorizations to the Finacle application using RSA Identity Governance & Lifecycle (RSA IGL).

The web service connector is enabled to handle the complex service API of Finacle. The RSA IGL Finacle web service handler makes use of various service files in order to externalize the configuration.

Finacle is a core banking product developed by Indian corporation Infosys that provides universal banking functionality to banks. In August 2015, Finacle became part of EdgeVerve Systems Limited. Finacle is used by banks across 84 countries that serve over 450 million customers. Finacle web service implementation is soap based to take advantage of standard web service modules and to make it protocol independent.

KEY FEATURES & BENEFITS:

High level use cases which can be achieved with the help of this solution are:

- Create accounts and add authorisations in Finacle, as part of the Joiner or Mover process.
 - Remove authorizations from accounts in Finacle.
 - Disable accounts in Finacle as part of Leaver process.
 - Simple access request forms for users to gain access and/or authorisations within Finacle.
- Connector capabilities which are in scope, include:
 - Create account
 - Add/Remove authorization
 - Disable account
