COURSE OVERVIEW

EC-Council's Certified CISO Program has certified leading information security professionals around the world. A core group of high-level information security executives, the CCISO Advisory Board, formed the foundation of the program and outlined the content covered by the exam, body of knowledge, and training. Some members of the Board contributed as authors, others as exam writers, others as quality assurance checks, and still others as instructors. Each segment of the program was developed with the aspiring and sitting CISO in mind and looks to transfer the knowledge of seasoned executives to the next generation of leaders in the areas that are most critical in the development and maintenance of a successful information security program.

WHY CISO?

The CCISO Certification is an industry-leading program that recognizes the real-world experience necessary to succeed at the highest executive levels of information security. Bringing together all the components required for a C-Level positions, the CCISO program combines audit management, governance, IS controls, human capital management, strategic program development, and the financial expertise vital to leading a highly successful IS program. The job of the CISO is far too important to be learned by trial and error. Executive level management skills are not areas that should be learned on the job. Material in the CCISO Program assumes a high-level understanding of technical topics and doesn't spend much time on strictly technical information, but rather on the application of technical knowledge to an information security executive's day-to-day work. The CCISO aims to bridge the gap between the executive management knowledge that CISOs need and the technical knowledge that many sitting and aspiring CISOs have. This can be a crucial gap as a practitioner endeavors to move from mid-management to upper, executive management roles. Much of this is traditionally learned as on the job training, but the CCISO Training Program can be the key to a successful transition to the highest ranks of information security management.

COURSE OUTLINE

- Domain 1: Governance
- Domain 2: Security Risk Management, Controls & Audit Management
- Domain 3: Security Program Management & Operations
- Domain 4: Information Security Core Concepts
- Domain 5: Strategic Planning, Finance & Vendor Management

EXAM INFORMATION NUMBER OF

QUESTIONS: 150

DURATION: 2.5 hours

TEST FORMAT: Multiple Choice

TEST DELIVERY: EC-Council Exam Portal

PASSING SCORE

In order to maintain the high integrity of our certifications exams, EC-Council Exams are provided in multiple forms (i.e. different question banks). Each form is carefully analyzed through beta testing with an appropriate sample group under the purview of a committee of subject matter experts that ensure that each of our exams not only has academic rigor but also has “real world” applicability. We also have a process to determine the difficulty rating of each question. The individual rating then contributes to an overall “Cut Score” for each exam form. To ensure each form has equal assessment standards, cut scores are set on a “per exam form” basis. Depending on which exam form is challenged, cut scores can range from 60% to 78%.
