

SecurID Authenticator 6.1.2 for Windows Release Notes

December 2022

This document describes what's new in SecurID Authenticator 6.1.2 for Windows. Read this document before installing the software. This document contains the following sections:

- [What's New in This Release](#)
- [Installing SecurID Authenticator for Windows](#)
- [Product Documentation](#)
- [Support and Service](#)

These Release Notes may be updated. The most current version can be found on RSA Community at: <https://community.securid.com/t5/secrid-authenticator-for/tkb-p/secrid-authenticator-windows>

What's New in This Release

SecurID Authenticator 6.1.2 for Windows

SecurID Authenticator 6.1.2 supports localization for US English and the following languages:

- French (fr)
- German (de)
- Italian (it)
- Japanese (ja)
- Korean (ko)
- Portuguese (pt)
- Simplified Chinese (zh-Hans)
- Spanish (es)

Features

- Functions as an unified app for AM OTP credentials and CAS MFA credentials (Approve, Biometric, CAS OTP credentials)
- Manages DS100 hardware authenticators and third-party FIDO Security Keys
- Migrates existing RSA SecurID Software Token 5.x OTP credentials to SecurID Authenticator
- Exports the SecurID Authenticator logs to the administrator for troubleshooting
- Displays credentials in a grid and enables re-ordering
- Co-exists with RSA SecurID Software Token 5.0 for Windows

- Allows upgrading to SecurID Authenticator 6.1.2 from RSA Authenticator 3.x , SecurID Authenticator 6.0.1, 6.1.0, and 6.1.1.
- Supports localization in languages such as French, German, Japanese, Portuguese, Chinese, Spanish, Italian, and Korean.

Upgrade and Migration Options

SecurID Authenticator 6.x is not an update to the existing RSA SecurID Software Token 5.0 for Windows app. Existing RSA SecurID Software Token 5.0 users are not required to reimport the AM OTP credentials, instead those credentials will be automatically migrated to the new SecurID Authenticator 6.x on the first launch. After migration, users can still access credentials in the RSA SecurID Software Token 5.0 until the 5.x app is removed from the computer. Both Apps can and will have same AM OTP credentials and display same OTPs.

Unsupported Features

- Connected RSA SecurID 800 Authenticator
- Internet Explorer Plug-In that display & auto enters OTP
- Storage devices like a TPM or another supported device plug-in (like an IronKey USB Flash drive)
- Older versions of Windows OS XP, Vista, 7, 8.x, and previous versions of Windows 10 1903
- Single Database for all OS users on a computer
- RSA SecurID Software Token with Automation
- Windows OS Roaming profile
- 32-bit support
- Copy protection not configurable, enabled by default.
- Provisioning of AM OTP credential using Compressed Token Format (CTF)

Installing SecurID Authenticator for Windows

System requirements

You can install SecurID Authenticator on Microsoft Windows 10 1903 or later.

Software Distribution

The app is distributed through a public Microsoft Store for end user installation and the RSA Community site as a DISM package for IT administrator side-loading. Customers can download the app package from the following links:

- [Microsoft Store](#)
- [RSA Community Link](#)

For installation instructions, see "Installing SecurID Authenticator" in the [SecurID Authenticator 6.1.2 for Windows Administrator's Guide](#).

Product Documentation

The product documentation is available on RSA Community link on the [SecurID Authenticator for Windows Documentation](#) page.

Document	Audience	Description
SecurID Authenticator 6.1.2 Administrator's Guide (PDF)	Administrators	Manage app deployment, token provisioning, and Help Desk issues.
SecurID Authenticator 6.x Provisioning Guide (PDF)	Administrators	Provides information for security administrators on deploying and managing the SecurID Authenticator for Windows.
SecurID Authenticator for Windows Quick Start Guide (PDF)	App Users	Install and use SecurID Authenticator 6.1.2 app as quickly as possible.
End User Online Help	App Users	To access Help from the app, click the (?) icon. To get more information about your credential, click the (i) icon. Help is available online in English , French , German , Japanese , Portuguese , Chinese , Spanish , Italian , and Korean .

Support and Service

You can access community and support information on RSA link at <https://community.rsa.com>. RSA link contains a knowledgebase that answers common questions and provides solutions to known problems, product documentation, community discussions, and case management.

Support for SecurID Authentication Manager

Before you call Customer Support for help with the SecurID Authentication Manager appliance, have the following information available:

- Access to the SecurID Authentication Manager appliance.
- Your license serial number. To find this number, do one of the following:
 - Look at the order confirmation e-mail that you received when you ordered the product. This email contains the license serial number.
 - Log on to the Security Console, and click **License Status**. Click **View Installed License**.
- The appliance software version. This information is located in the top, right corner of the Quick Setup, or you can log on to the Security Console and click **Software Version Information**.

Support for the Cloud Authentication Service and Identity Routers

If your company has deployed identity routers and uses the Cloud Authentication Service, RSA provides you with a unique identifier called the Customer Support ID. This is required when you register with RSA Customer Support. To see your Customer Support ID, sign in to the Cloud Administration Console and click **MyAccount> Company Settings**.
